

LOBITE

EXTENSION SYSTEM

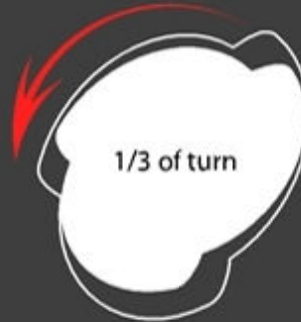

by
LONGONI

NO THREAD

LOBITE is the first joint that doesn't need a thread to close. The innovative section with three lobes innovates the way of constructing a joint. A step ahead in the future.

2 FAST 4 YOU

LOBITE has a brand new shape. With one third of turn you can easily close tightly the joint. No vibrations or loose feelings.

EASY TO INSTALL

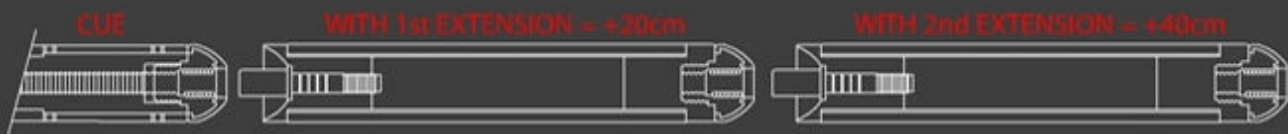

LOBITE has been developed to be easily installed by any skilled technician on any Longoni carom butt (minimum end diameter of 32 mm is required)

STYLE BEHIND TECHNIC

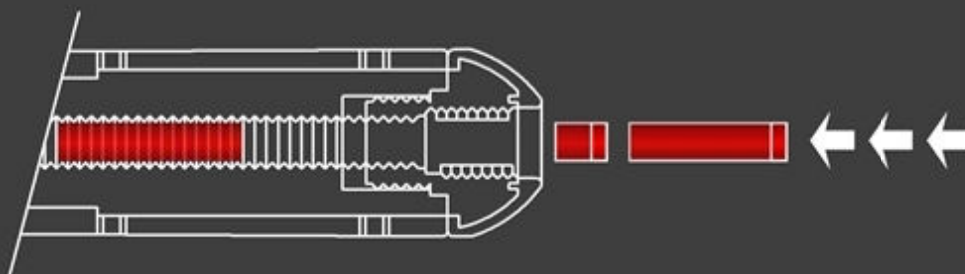

The rubber bumper has been developed to match with any cue design. Avoid any kind of vibration and it's easy to replace in a few seconds.

The **LOBITE** system, thanks to its modularity, gives you the possibility of installing more than one extension. At the end of each extension **LOBITE** you'll have the joint to connect a new one. Stability and resistance are guaranteed. A maximum of 3 extensions is suggested.

CUE WEIGHT AND LOBITE

LOBITE guarantees you the possibility of adding or removing original Longoni new system of weights (art 14419).
